Why Practices Consider Practice Claim

Revenue cycle support designed for the way modern practices work.

Five ways Practice Claim helps your practice thrive

				
Reduce preventable denials	Strengthen payer follow-up	Improve revenue visibility	Recover aged A/R	Connect practice operations
Rigorous claim review and coding validation help improve first-pass acceptance and reduce rework.	Persistent, documented follow-up with payers moves claims forward and shortens payment cycles.	Clear reporting and real-time insights help you track performance and make confident decisions.	Targeted A/R workflows and appeals support help recover dollars you've earned but haven't collected.	We align with your front office and clinical teams to keep workflows synchronized and efficient.

Our proven approach

			
1 Assess	2 Align	3 Implement	4 Support
We evaluate your workflows, metrics, and opportunities.	We tailor a plan that fits your practice goals and priorities.	We onboard quickly with minimal lift for your team.	We provide ongoing support, reporting, and continuous improvement.

EHR & Practice Management solutions available through Practice Claim.
Connected with our **RCM services**.

Let's build a stronger revenue cycle—together.
